"Legitimate visitors without credentials can be safely and easily identified using Aiphone Video Intercoms."
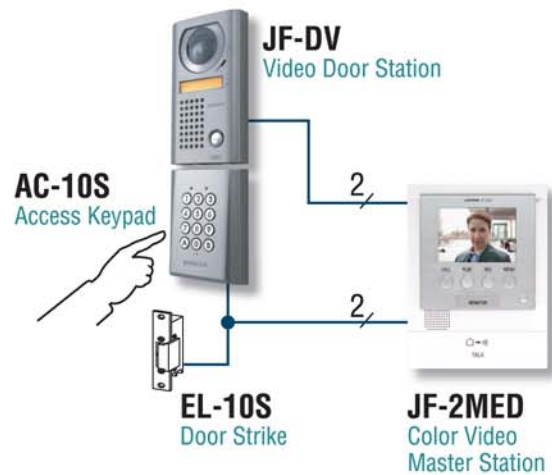

Access Control for small facilities...

- Office parks • School portables • Single family homes
- Retail • Clinics • Restaurants • Secured work areas

With up to 100 user codes, Aiphone's Access Control Keypad allows for quick and easy access to secured areas. The AC-10S matches the design of the JF-Series JF-DV video door station. This system supports up to 2 doors and 3 master stations.

AX-DV-XP **AX-DVF-XP** **XP Kit**

AX Series Integratable Communication Color Video Door Stations   Includes keypad, program cards, 10 blank cards

"Communication at locked entrances is key especially for those who might be missing theirs."

Access Control for...

- Office parks • School portables • Single family homes
- Retail • Clinics • Restaurants • Secured work areas

The easiest and most cost effective way to install access control devices with communication capabilities. The AX Series allows users to view additional CCTV images on the master stations while door call-ins may be transferred to a telephone line for the best in security integration.
